RE : Application for Software Developer / Backend Engineer Position

Dear Hiring Manager,

I am a final-year B.Tech Computer Science student at Shri Ramdeobaba College of Engineering, Nagpur (CGPA: 8.11/10), graduating in 2026, with over six months of hands-on internship experience building and shipping production-grade REST APIs. I am writing to express my strong interest in joining your engineering team as a Software Developer.

During my internship at **Yashone Consultancy Services**, I developed and maintained 15+ REST APIs for an enterprise Tender Management System using **Node.js**, **Express.js**, **PostgreSQL**, and **Prisma ORM**. I implemented JWT authentication and role-based access control securing 50+ users, and optimized PostgreSQL queries to improve API response times by **30%**. More recently, at **Systemstar**, I owned 7+ production features end-to-end using **TypeScript** and **NestJS**, authored reusable modules that cut duplicated logic by **35%**, and collaborated in structured Agile code reviews with cross-functional teams.

Beyond internships, I have built real-world projects that reflect my depth of understanding: a **real-time collaborative whiteboard** (Node.js + WebSockets + Docker) handling 20+ concurrent users at sub-50ms latency, and a **peer-to-peer payment platform** deployed on AWS EC2 with full JWT security and optimized MongoDB indexing. My LeetCode rating of **1474**, HackerRank certifications, and open-source contributions to OpenStreetMap and Open Library further reflect my commitment to strong fundamentals and collaborative engineering.

I am deeply motivated by the opportunity to contribute to a team that values clean, maintainable code and continuous improvement. I bring not just technical skills in Node.js, TypeScript, PostgreSQL, MongoDB, and Docker, but also the discipline of writing thorough documentation, participating in code reviews, and taking ownership from requirements to deployment.

I would welcome the chance to discuss how my background aligns with your team's needs. Thank you for your time and consideration — I look forward to hearing from you.

Sincerely,

VED Pandhare
